Indice sistematico per numeri successivi del periodico

N. 1 4 Settembre 1982

pag.

1 E. Sorace and M. Tarlini – On the symplectic theory of two relativistic spinning particles.

7 M. Calvani and L. Nobili – Comptong heating and cooling and astrophysical jets.

14 A. T. Abrosimov, V. P. Lobanova, K. P. Vishnievskaja, G. Bellini, M. di Corato, E. Meroni, L. Moroni, F. Palombo, P. L. Frabetti, L. K. Litkin, V. I. Nikanorov and S. Otwinowski – Two-particle correlations in pion-nucleus interactions at 40 GeV/c.

19 C. R. Garibotti and P. A. Massaro – A regularization method for Fourier series of discontinuous functions.

25 J. S. Dehesa – New properties of the spheroidal wave equation.

29 S. Rosati and R. Schiavilla – Calculation of Coulomb energy for spherical nuclei.

N. 2 11 Settembre 1982

pag.

33 R. Giordano, F. Porto, S. Sambataro and A. Scalia – Fusion cross-section from modified SOD method.

39 O. Costa De Beauregard – $\mathscr{CPT}$ revisited: covariant-motion reversal as equivalent to the particle-antiparticle exchange.

41 H. Kleinert – Towards a unified field theory of defects and stresses.

46 G. Cavalleri and G. Spinelli – On Barut's heuristic calculation of Planck's constant.

49 M. Gürses – Maxwellian Yang-Mills fields.

53 G. Tarozzi – Two proposals for testing physical properties of quantum waves.

60 J. Leite Lopes, D. Spehler and N. Fleury – Spinor gauge invariance and the wave equation of spin-$\frac{3}{2}$ fields.

N. 3 18 Settembre 1982

pag

65 A. D'Innocenzo and P. Rotelli – A branching model with precocious KNO scaling.

75 Y. Kudo – Nonlocal separable bound-state kernels in finite-range DWBA.

79 D. Y. Kim and S. I. H. Naqvi – Remarks on the neutrino oscillation.

83 Ph. Droz-Vincent – Relativistic scattering properties of some two-body systems.

87 G. M. Cicuta – Topological expansion for SO_N and Sp_{2N} gauge theories.

pag.
93 L. Galgani and G. Benettin – Planck's formula for classical oscillators with stochasticity thresholds.
97 R. Cenni, G. Dillon and P. Saracco – Pion condensation and momentum dependence of the effective particle-hole interaction.
102 S. Minami – 0^+ gg state and neutral mesons of the scalar decuplet.
107 A. Patrascioiu and A. Rouet – The nonlinear σ-model; a critical analysis of semi-classical results.

N. 4 25 Settembre 1982
pag.
113 M. Di Nardo, M. Di Toro, G. Giansiracusa, U. Lombardo and G. Russo – Semi-classical description of isoscalar giant monopole and quadrupole resonances.
121 K. Ushio – Two-muon production in the electron-electron scattering as a test for the Majorana neutrino.
126 M. Nakamura – Comments on the very peculiar $\Lambda\overline{\Lambda}$ pair production in one arm of the 2-jet event in e^+e^- annihilation.
129 A. Tukrin – On prehistory of spin kinematics.
132 D. C. Joshi – On the gravitational-charge quantization condition.
135 S. Y. Tsai – A quark statistical model for quark fragmentation.
138 B. H. Lavenda – Nonequilibrium stochastic transitions and quantum-mechanical tunnelling.

N. 5 2 Ottobre 1982
pag.
145 A. D. Jannussis – New interpretation of the scalar product in Hilbert space.
147 B. S. Rajput, P. Joshi and O. P. S. Negi – Shape of a body under real superluminal Lorentz transformations.
154 S. Fajfer and D. Tadić – K^0-$\overline{K}^0$ transition amplitude in a potential model for the quark confinement.
157 A. M. Bizzeti Sona, P. A. Mandò and A. A. Stefanini – A $\tau_m = 27$ ns isomer in ^{102}Rh.
161 R. Giordano, F. Porto, S. Sambataro and A. Scalia – Reaction and fusion cross-sections for identical heavy ions.
165 A. De Rosa, G. Inglima, V. Russo and M. Sandoli – Pre-equilibrium emission from quasi-molecular states in heavy-ion collisions.
171 P. Leal Ferreira – Time symmetries involving magnetic monopoles.

N. 6 9 Ottobre 1982
pag.
177 M. Nishioka – Conformal transformations and examples of field theory.
181 F. Calogero – Disproof of a conjecture.
186 H. J. Efinger – On the stability of solitary-wave solutions of Yukawa-coupled Klein-Gordon-Schrödinger equations.
189 L. Mistura – The free energy of a crystal with a continuous distribution of dislocations.
193 G. L. Braglia, L. Romanò and M. Diligenti – Monte Carlo and Boltzmann calculations of electron transport in N_2.

pag.
200 A. O. Barut and S. A. Basri – Connection between the stable-particle model and the integrally charged quark model.
205 B. S. Rajput – Comments on « Heavisidian monopoles and quantization of gravitational charge ».

N. 7 16 Ottobre 1982
pag.
209 S. Iwao – Decay characteristic of $\iota(1440)$.
213 Y. Takano – Gauge fields in Finsler spaces.
218 H. J. Efinger – Lower-bound estimates on the coupling constant of certain nonlinear Schrödinger equations by L^p-inequalities.
221 F. Alonso, J. Julve and A. Tiemblo – Covariant generation of vector gauge boson and nonlinear background field calculations.
226 Fazal-e-Alem – Dipole pomeron and π^-p elastic scattering at high energies.
231 T. Yoshimura and A. Vancura – Instability of parametrization of fermion mixing in the presence of parity-violating interactions.
236 T. Yoshimura and A. Vancura – Pology of mixed multiplets with already broken symmetries.

N. 8 23 Ottobre 1982
pag.
241 S. Catto and F. Gürsey – A class of supersymmetric effective actions.
249 E. Triantafillopoulos – Remarks on backward ω^0 photoproduction.
256 Ph. Gueret and J. P. Vigier – Nonlinear Klein-Gordon equation carrying a nondispersive solitonlike singularity.
260 Ph. Gueret and J. P. Vigier – Soliton model of Einstein's « Nadelstrahlung » in real physical Maxwell waves.
265 J. A. Brooke and W. Guz – The baryon mass spectrum from Born's quantum metric operator.
271 J.-P. Lebrun – Finite extension fermion wave-functions in QCD.

N. 9 30 Ottobre 1982
pag.
273 F. Calogero – Lagrangian interpolation and differentiation.
279 P. Bon, T. A. Minelli, A. Pascolini and D. Toniolo – Soliton fission and tunnelling in electric lines.
285 M. Der Sarkissian – Cosmological consequences of permanent quark confinement.
292 L. Bosi, P. Gagliardelli and M. Nimis – F'-centre formation in additively coloured NaF:Li.
295 K. Senba and M. Tanimoto – The decay mode of a glueball $\iota(1440)$.
300 W. Mückenheim – A resolution of the Einstein-Podolsky-Rosen paradox.

N. 10 6 Novembre 1982
pag.
305 V. Hussin – On Wigner's little groups and scale transformations.
309 A. Lanza, J. C. Miller and S. Motta – Relativistic shocks in a Synge gas.
315 R. Goldoni – Newtonian limit of bimetric Machian gravitation.

pag.
320 R. A. Buchl and B. P. Nigam – Approximate strength of a direct proton-positron coupling.
323 D. S. Kulshreshtha and R. S. Kaushal – Beauty mesons in the two-step potential model.
327 O. Filisetti, G. Lovera and V. Mussino – Cosmic-ray 13 day oscillation and two-sector interplanetary magnetic field.
331 Chen-er Lee, Yeou Wei Yang and T. H. Wong – On the SU_3 breaking factor.
335 L. Nobili, R. Turolla and M. Calvani – Are thick accretion disks the « central engine » for astrophysical jets?
341 A. da Silveira – Dirac-like form for the linear equations for the gravitational field.
345 B. Dasmahapatra, B. Čujec and F. Lahlou – The $^{12}C+^{12}C$ resonances between $E_{c.m.} = 4.5$ and 6 MeV.
352 M. Pavšić and E. Recami – Charge conjugation and internal space-time symmetries (Erratum).

N. 11 13 Novembre 1982
pag.
353 L. Ronchi, S. Barbarino, F. Grasso, G. Guerriera, F. Musumeci and A. Scordino – An addition theorem for spherical wave functions.
358 K. Ozaki – $K_L^0 \to \gamma\gamma$ in a relativistic quark model.
361 J. Beckers and S. Sinzinkayo – Conformal point transformations, invariance conditions and Lie derivatives.
365 A. G. Agnese and M. La Camera – Gravitation without black holes.
370 P. Bocchieri, A. Loinger and G. Siragusa – Remarks on « Observation of Aharonov-Bohm effect by electron holography ».
373 E. Donato, B. Ginatempo, E. S. Giuliano, R. Ruggeri and A. Stancanelli – Electronic density of states and Fermi surface of the $Ta_{0.5}$-$W_{0.5}$ alloy.
377 A. Bach – Quantim-mechanical aspects of the theorem of Gleason, Kahane, Zelazko.
381 E. R. Caianiello – Geodesics of free particles in QM phase space: free mass as a quantum effect, reciprocity.

N. 12 20 Novembre 1982
pag.
385 E. Donato, B. Ginatempo, E. S. Giuliano, R. Ruggeri and A. Stancanelli – Electronic density of states in Ni_6-Nb_4 metallic glass.
389 P. P. Delsanto and P. Quarati – Nucleon-antinucleon potential parameters from the Ramsauer effect in $\bar{p}p$ low-energy scattering.
393 M. Lutzky – Isospectral representations of dynamical systems.
398 R. Nath and R. K. Sharma – Photon counting statistics for phase radiation.

N. 13 27 Novembre 1982
pag.
401 G. Bruce Mainland and D. M. Scott – Quantization of a charge magnetic-dipole model in 2 + 1 dimensions.
405 H. Kleinert – Disorder version of Abelian Higgs model and the order of the superconductive phase transition.

pag.
413 E. N. Alexeyev, M. M. Boliev, A. E. Chudakov, B. A. Makoev, S. P. Mikheyev and Yu. V. Sten'kin – Search for superheavy magnetic monopoles at the Baksan undergound telescope.
419 N. V. Mitskiévič and Y. E. Senin – An interior NUT solution.
423 H. Konashi, K. Konashi and K. Shigemoto – Neutrino pair production in e^+e^- collision; a method for neutrino distinction and family counting.
427 X. Fustero and D. Pavón – Relaxation terms and entropy production in a cosmological model.
430 N. Quien – Conditions for the existence of a product structure in a cosmological model.

N. 14 4 Dicembre 1982
pag.
433 J. Quartieri – Some mathematical considerations arising in the study of a degenerate harmonic oscillator.
437 G. C. Joshi and J. W. G. Wignall – Universal potential curves for quarkonia.
443 R. Bhandari – K-matrix formalism and the quasi-two-body phase space factor in the isobar model.

N. 15 11 Dicembre 1982
pag.
449 L. N. Epele, H. Fanchiotti and C. A. García Canal – Fustrated phase in the Z_2 gauge model.
452 E. B. Manoukian – Low-energy limit of Feynman graphs in Minkowski space.
455 H. Jehle – Electromagnetic field of a rotating closed singular magnetic flux line and of a distribution of those corresponding to a Bohr-magneton dipole.
457 G. Cerofolini – On the formal equivalence between a reformulation of Bohm and Bub's hidden-variable theory and subquantum mechanics.
460 E. Gadioli, E. Gadioli Erba, R. Gaggini, P. Guazzoni, P. Michelato, A. Moroni and L. Zetta – Experimental evidence of the spectator role of the Bi valence proton in the $^{209}Bi(p, \alpha)^{206}Pb$ reaction.

N. 16 18 Dicembre 1982
pag.
465 G. Falcone, D. Matragrano and A. Oliva – Energy distribution of sputtered excited atoms.
469 P. Bocchieri and A. Loinger – Incompatibility of the Aharonov-Bohm effect with the quantum laws.
473 S. Iwao – Neutrino and antineutrino production of heavy flavours.

N. 17 25 Dicembre 1982
pag.
481 S. Iwao - Decay characteristics of θ(1670).
485 A. D. Jannussis and V. Papatheou – Remarks on the complex time of physical phenomena.
488 P. A. Massaro – Darboux approximation for the nonrelativistic binding energies of isoelectronic ions.
491 M. Schaden and J. Baier – Reduced relativistic $N\bar{N}$-scattering equations including virtual negative-energy states.
